Projects

User Management System

Built a User Management System using Node.js and MongoDB to handle CRUD operations (Create, Read, Update, Delete) efficiently with RESTful APIs.

- Features:** Enabled user creation, retrieval, updating, and deletion, with secure data storage in MongoDB and seamless API integration using Express.js.
- Technologies Used:** Node.js, Express.js, MongoDB, JavaScript, and Postman for API testing.
- Outcome:** Delivered a scalable and efficient system for managing user data, improving backend development skills and database integration expertise.

E-Commerce site

Developed a dynamic e-commerce website using React and Redux Toolkit, integrated with the Fakestore API to fetch and display product details in real-time.

- Features:** Includes "Add to Cart," cart details with total price, and sorting items by price in ascending or descending order.
- Technologies Used:** React, Redux Toolkit, Tailwind CSS, Axios for API calls, and React Router for navigation.
- Outcome:** Delivered a fully functional e-commerce platform with efficient state management, enhancing user experience and demonstrating expertise in modern web development.
