Professional Summary

• Enthusiastic Full-Stack Developer (MERN) skilled in building scalable, responsive web apps with secure auth, RESTful APIs, and cloud deployment. Experienced in optimizing backend APIs and frontend performance. Passionate about Blockchain, AI, and Web3 for user-focused solutions.

TECHNICAL SKILLS

• Frontend: HTML5, CSS3, JavaScript, React.js, Next.js, Tailwind CSS

• Backend: Node.js, Express.js, Python

• Database: MongoDB, SQL

• Version Control And Tools: GitHub, Postman

• Other: RESTful APIs, Responsive Design, React Hooks, AWS EC2, Jenkins

• Deployment: Vercel, Render, Netlify

EXPERIENCE

• iMeta Technologies - Full Stack Software (May 2025 - Present)

Blockchain, AI, and Web3 solutions provider for scalable KYC/AML and client onboarding in financial services.

• Full-Stack NFT Marketplace Platform

- Developed a dynamic NFT marketplace, enabling secure NFT trading via WalletConnect, processing 100+ NFT transactions during testing.
- Built frontend (React.js, CSS3) and backend APIs (Node.js, Express.js, MongoDB), optimizing transaction workflows and improving user engagement by 20
- Deployed on Vercel (frontend) and Render (backend) for scalable and reliable hosting.
- Technologies Used: React.js, CSS3, Node.js, Express.js, MongoDB, WalletConnect, Vercel, Render

• User Management System

- Designed and built a User Management System with Node.js and MongoDB, enabling efficient CRUD operations via RESTful APIs.
- Developed API endpoints for user creation, retrieval, updating, and deletion.
- Integrated Express.js for streamlined API handling.
- Technologies Used: Node.js, Express.js, MongoDB, JavaScript, Postman

EDUCATION

• Bachelor of Technology in Computer Science

Mansarovar Global University, Madhya Pradesh CGPA: 7.61 — 2018 - 2022

CERTIFICATES

- MERN-Stack Development Qspiders Dec 2024
- Develop GenAI Apps with Gemini and Streamlit Google cloud Feb 2025
- Gen AI Academy Google cloud Apr 2025
